Aligning Purpose, People and Performance to Achieve More

The Vector Group works with executives, entrepreneurs and emerging leaders who are focused on taking their respective companies to the next level of performance while infusing a greater sense of purpose within the organization's culture. Through years of experience, we understand how to work with fast paced, growth-oriented companies where accountability and performance is king.

Only 15% of companies outpaced their industry growth rate in 8 out of the past 10 years.¹

Businesses rely on The Vector Group to help build a more sustainable enterprise through strategic planning, growth consulting, leadership coaching and advisory boards development. We deploy a series of proven methodologies, processes and approaches that drive value creation of an enterprise. Adopting these principles led to a major client being selected as a seven-time INC 5000 fastest growing company.

Fewer than 27% of family businesses with sales below 50 million in revenue deploy an active advisory board.²

We engage with organizations poised for growth, ready to take their business to the next level and in need of guidance as they embark upon that path. Many are family-owned or privately held businesses that recognize the need to evolve and transition from being a smaller entrepreneurial led company to a more professional managed enterprise.

CORE VALUES

- ▶ Collaborate with Care
- ▶ Communicate with Candor
- ▶ Act with Conviction
- ▶ Advise with Honor
- ▶ Succeed serving Others

SERVICES

-  Strategic Planning
